LIFETIME FLEET

Deep Tech Pulling 2050 Climate Targets into 2026.

Key Point: Great science needs execution. We are the ecosystem pulling net-zero targets forward using Agentic AI and Robotics.

The Climate Execution Gap

Context: Climate plans are failing because of a lack of physical execution.

The Pincer Crisis:

Aging Populations: Rising demand for services.

Rising Costs: Logistics and energy are becoming more expensive.

The Failure:

Current tools are "dumb wrappers" that optimize spreadsheets, not the real world.

The Need:

Patients need physical assistance, not just a ride.

Lifetime Fleet

Cars, Drones, Robots

The Anatomy of Execution

Concept: We built a full organism to solve the gap.

The Brain

DWS IQ Platform (Ingests global data & runs optimization).

The Body

Firehorse (Agentic software that makes autonomous decisions).

The Hands

Lifetime Fleet (Robots, drones, and vehicles moving atoms).

Result: One integrated loop owned by Lifetime World.

Inside the Networks You Trust

Validation:

Lifetime Fleet is already live on **Uber's network** and a contractor for **Taksi Helsinki (Kela)**.

Metrics:

€10k

Monthly Recurring Revenue (MRR)

15

Assisted rides per day

The Upgrade:

We are upgrading these human-driven rides with robots and agents to increase margin and capacity without increasing headcount.

The Wedge Strategy: Post-Hospital Mobility

The Entry Point:

High-margin "Hospital Discharge" services.

The Pain:

Hospitals need to discharge patients safely; ambulances are too expensive, taxis are too basic.

Business Model:

SaaS Fees: For the "Brain" (Platform licensing).

Service Fees: For the "Hands" (Physical care/MaaS).

Validated Architecture.

\$150/mo OpEx.

Validation:

Implementation plans validated
by **AWS and Google Engineers.**

The Stack:

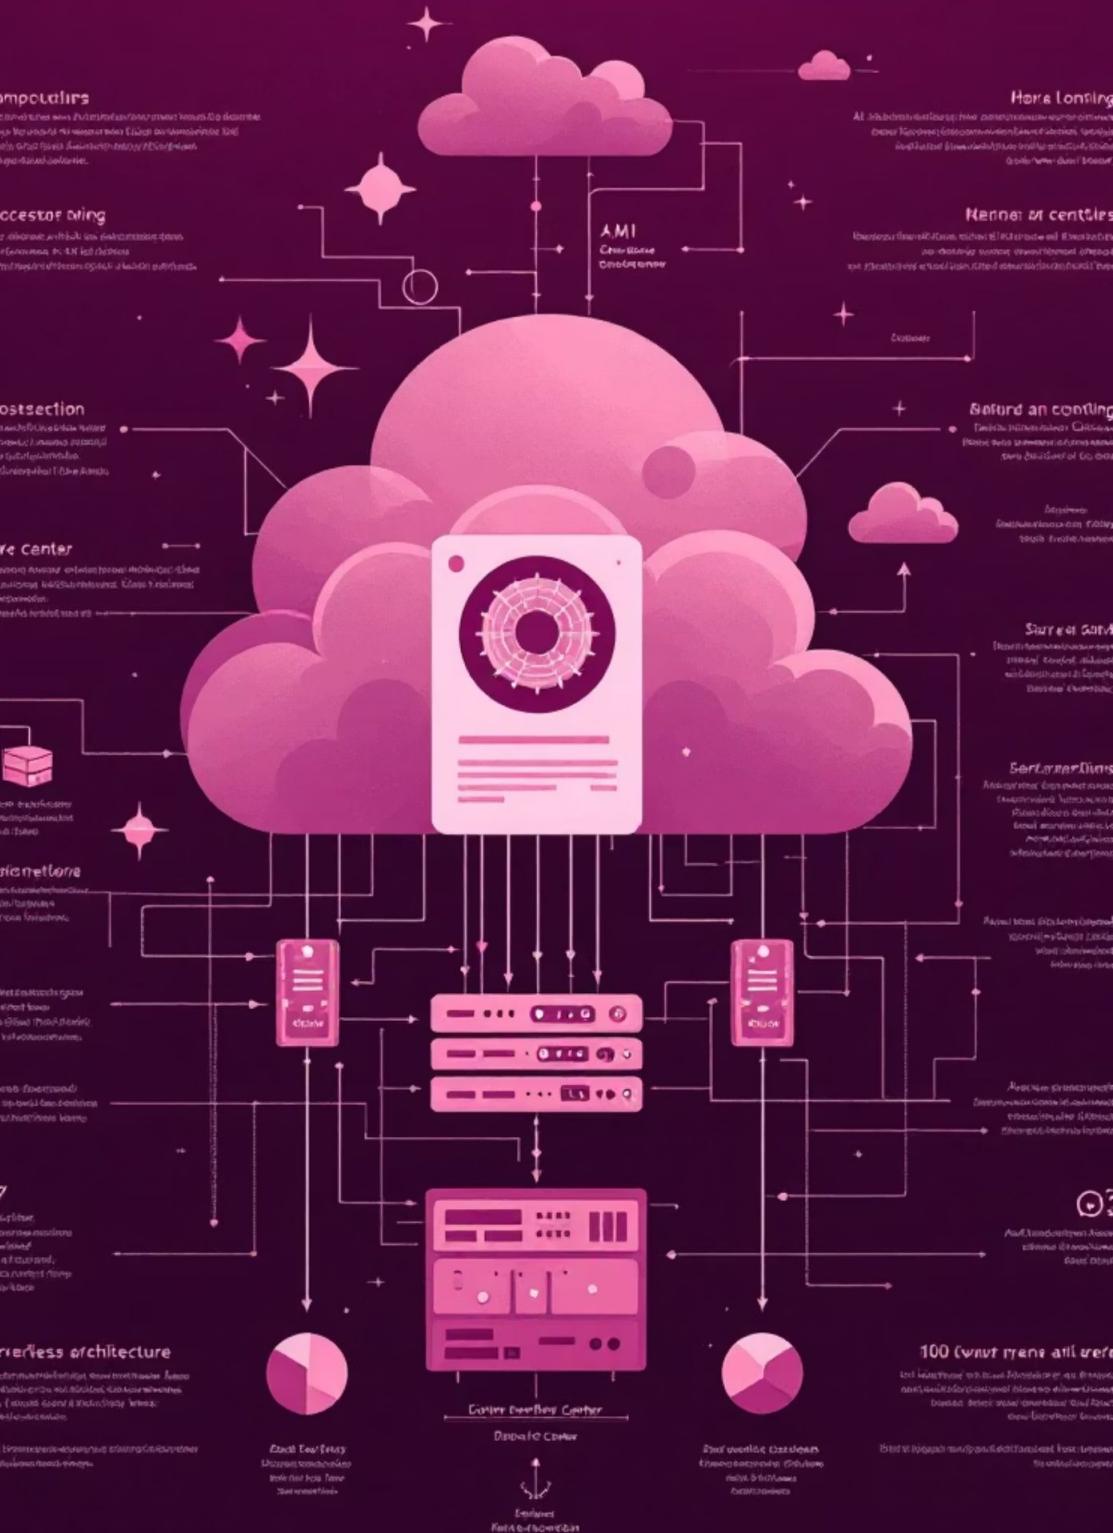

Hybrid architecture using NVIDIA, Groq inference, and Serverless Cloud Run.

The Efficiency:

We operate the DWS IQ MVP for
~\$150/month.

Advantage:

We have massive AI capability
with a near-zero cost base.

Operators, Not Theorists

Leadership

Lifetime Studios – Veterans in enterprise architecture and logistics operations.

The Army

Powered by the **Lifetime Consortium** – 150 specialized partners for hardware and compliance.

Credibility

We run real logistics inside Uber and Kela today. We have the agility of a startup and the muscle of a giant.

Bridge to Series A

The Ask: €150,000 Strategic Bridge

The Terms:

SAFE with **€3.8M Valuation Cap.**

Use of Funds:

100% into Deployment (Atoms, not Cloud).

Milestones:

Deploy **5 Robotic Assistants**.

Reach **€25k MRR**.

Sign first **Major Hospital Partnership**.

Stop Burning. Start Caring.

Call to Action: The world is waiting
for 2050. We aren't.

Closing: Invest in Execution. Join Lifetime World.
